

UnixUnusedFd

+ fd

+ flags

+pNext

The diagram shows a vertical rectangle representing a node in a linked list. The top section is labeled 'UnixUnusedFd'. Below it, there are two fields: '+ fd' and '+ flags'. To the right of the 'flags' field, there is a blue curved arrow pointing from the right side of the node to the text '+pNext'. The arrow starts from a small blue diamond on the right edge of the node, curves upwards and to the right, and ends at the text '+pNext'.
