

```
query_columns< ::ebi  
::vcf::BodySectionError,  
id_sqlite, A::base_traits >
```

A diagram showing inheritance. A blue arrow points from the middle box to the top box. The top box contains the definition of query_columns, which inherits from ebi::vcf::BodySectionError. The middle box contains the definition of odb::query_columns, which inherits from ebi::vcf::ChromosomeBodyError and has an additional parameter id. The bottom box contains the definition of odb::pointer_query_columns, which inherits from ebi::vcf::ChromosomeBodyError and has an additional parameter id. The bottom box is shaded gray.

```
odb::query_columns  
< ::ebi::vcf::ChromosomeBody  
Error, id_sqlite, A>
```

```
+      id
```

```
odb::pointer_query  
_columns< ::ebi::vcf  
::ChromosomeBodyError,  
id_sqlite, A>
```
