

```
query_columns< ::ebi  
::vcf::BodySectionError,  
id_sqlite, A::base_traits >
```

The diagram shows a vertical hierarchy of three boxes. The bottom box is shaded gray and contains the text 'odb::pointer_query_columns< ::ebi::vcf::FilterBodyError, id_sqlite, A>'. A blue arrow points upwards from the top of this box to the middle box. The middle box is white and contains the text 'odb::query_columns< ::ebi::vcf::FilterBodyError, id_sqlite, A>' followed by a list of attributes: '+ id', '+ error_fix', and '+ field'. Another blue arrow points upwards from the top of the middle box to the top box. The top box is white and contains the text 'query_columns< ::ebi::vcf::BodySectionError, id_sqlite, A::base_traits >'.

```
odb::query_columns  
< ::ebi::vcf::FilterBodyError,  
id_sqlite, A >
```

```
+ id  
+ error_fix  
+ field
```

```
odb::pointer_query  
_columns< ::ebi::vcf  
::FilterBodyError, id  
_sqlite, A >
```
